

Yes, after retirement for 20 + years , God' s provisions still exist, health , money, friends ... Thank you our Lord

During the pandemic - I was able to connect with new online friends and share meaningfully about who God is and what He's done in my life. Praying that small seeds of the gospel would grow in people's lives. God is at work in all our lives. He is good all the time!

Jesus has made anything seems impossible to everything is working for us.

When I first came to Canada, I couldn't go to school due to my status in Canada. I would have to pay for international tuition for high school which wasn't affordable to me and my family. However, after 8 months of prayer, I finally got to finish highschool in 2 years even though.

We know now to trust in him, though oftentimes we still feel hopeless. However, Jesus has shown his love through numerous miraculous things and we believe that he will never abandon after his grace and deliverance on us.

There are countless graces that God help me amazingly. God is miraculously let me regain my PR status. Even consultant said only very rare chances people can regain their status back after leaving Canada for many years. Lord our God is my father and my saviour.

God revealed to me the perspectives and habits which had been holding me back to experience true transformation through a difficult time in my life. At the time of, it was painful to realize how ugly and sinful my core is, but God reminds us that He disciplines those He loves. God cares about building our character. Our lives were not made to make us comfortable but so that His glory would shine through.

God always be with me !

Phone people who might be lonely or struggling and seeing how we can just stand with another by praying with them over the phone

I have experienced answer to prayer for people I have been praying for. One answer is someone come to believe 2 weeks ago! It is always exciting to see God answer the big and small prayers. Other prayers I am still waiting upon the Lord to answer.

He is working when I'm shouting to Him "where are you?", "How long?" He is working when I feel distressed and giving up Him and my son.

My family and I have been kept safe in the pandemic. We have all our needs met- food, shelter, employment. We have flourished financially too. We have been less busy which is a blessing. We can attend church service, without missing anything because it is online. We also did not have to miss any life group meeting because we can sign in from anywhere to attend.

Yes, after retirement for 20 + years , God' s provisions still exist, health , money, friends ... Thank you our Lord

God has kept my children healthy and they have been able to go to school, learn, grow, and make friends.

Close friends became even closer friends - being intentional with the time spent either in person or virtual

I have seen so many young people continue to meet together for fellowship and step up to lead during this pandemic.

He's always with me , providing me with all that I need, showing His love & faithfulness.

With prayers and trusting in God, all the previous difficulties and trials went through

God has continually been speaking to me throughout this pandemic. In the past I have not really had a strong sense of God's calling or telling his voice apart from everything else going on in my life. The more that I listen and obey what He tells me to do, the more I can feel His presence in my life.

Acknowledgement of my sins has always been easier than actually repenting of them, but now, with His guidance and obedience to Him, God has brought me out of my sin and shame. I am no longer weighed down by my guilt or shame, but walk in freedom in Him. Where I am unable, Christ completes. In Him, I am transformed. Praise be to God for His wonderful power!

God has given us opportunities to connect with our son.

My saviour has been so close to me during a very hurtful divorce. He walks with me through everything.

Sent other people, both Christian and none Christian, to say the right things at the right time even though I had not shared my struggles with them.

When I first moved to Vancouver for school I didn't know a single person in the whole city. I had heard of one friend who moved here - but we hadn't talked in almost a decade at that point.

My first full day in the city I was feeling down, alone and lonely - wondering if I had made the right decision to uproot my life and come here to study. As I was walking to the UBC bookstore to pick up my student ID, I just happened to run into that one friend who I hadn't seen in years.

We chatted and even got lunch together that day. I knew this was a sign from God - this is where I was supposed to be and God would provide for me along the way. He has!

TLDR: Through the highs and low, God has proven he is with me.

There was a time I was rejected after a job interview. I was extremely disappointed and upset with myself, while asking God was this my path. After meditating, I surrendered To God and prayed that God would show me his guidance and wisdom.

Although I am still upset from the past. I recognize that God is always with us. We may fall down in our lives but God is there to pick us up as long as we are willing to stand up and move forward for God and his kingdom.

God Bless.

God continues to bless us with health and a calm spirit while the world around us fell like it is troubled. God directs our path

God has been very faithful and work with me through this year. My knowledge has been extended. The hope, comfort and peace from God is huge and I never experience before. I believe, when this pass, after 10 years, I might not remember what I have done in 2018 or 2019, but I definitely will remember I had done on 2020. That will be God had walked with me even though the time was difficult but God has been supply me and fulfill me with his love.

God is the foundation and anchor of my life. Without God, I won't be able to be what I am today. Thank you Lord.

He has faithfully provided the right type of job for me at the right times in my life.

God has reminded me that we can never outperform or strive for his grace and love towards us. Friendship is a gift because we don't need to always have it together! We support and care for one another just as God loves us.

I found that the Lord answers my prayer when I trust & submit my problem to him. It could be anything, anywhere & anytime. When I make this habit in my daily life, my faith will grow & strengthened.

Protecting Grandma when she went missing, and then providing her with a good care home to live in.

Strengthened family relationships using the pandemi

In all the craziness and fatigue of the pandemic, it's been difficult to connect with people. At the same time, it's been such a blessing from God. He's taught me how to be intentional with people - time with my family, doing activities together we never would have (was always too busy...), chatting with people 1:1 virtually, writing with each other, asking questions and getting to know people on such a different level. He's blessed me with an encouraging and supportive small group that has not given up in meeting. We're able to share our struggles and loneliness and encourage each other in Christ. God's been weaving it all together in my life - each piece, the stressful parts and the enjoyable parts.

I was praying if I should change jobs during the pandemic. God gave me a confirmation to change jobs and it turned out very well. God provides when we obey. Praise the Lord!

I am doing some translation work for a Christian organization.

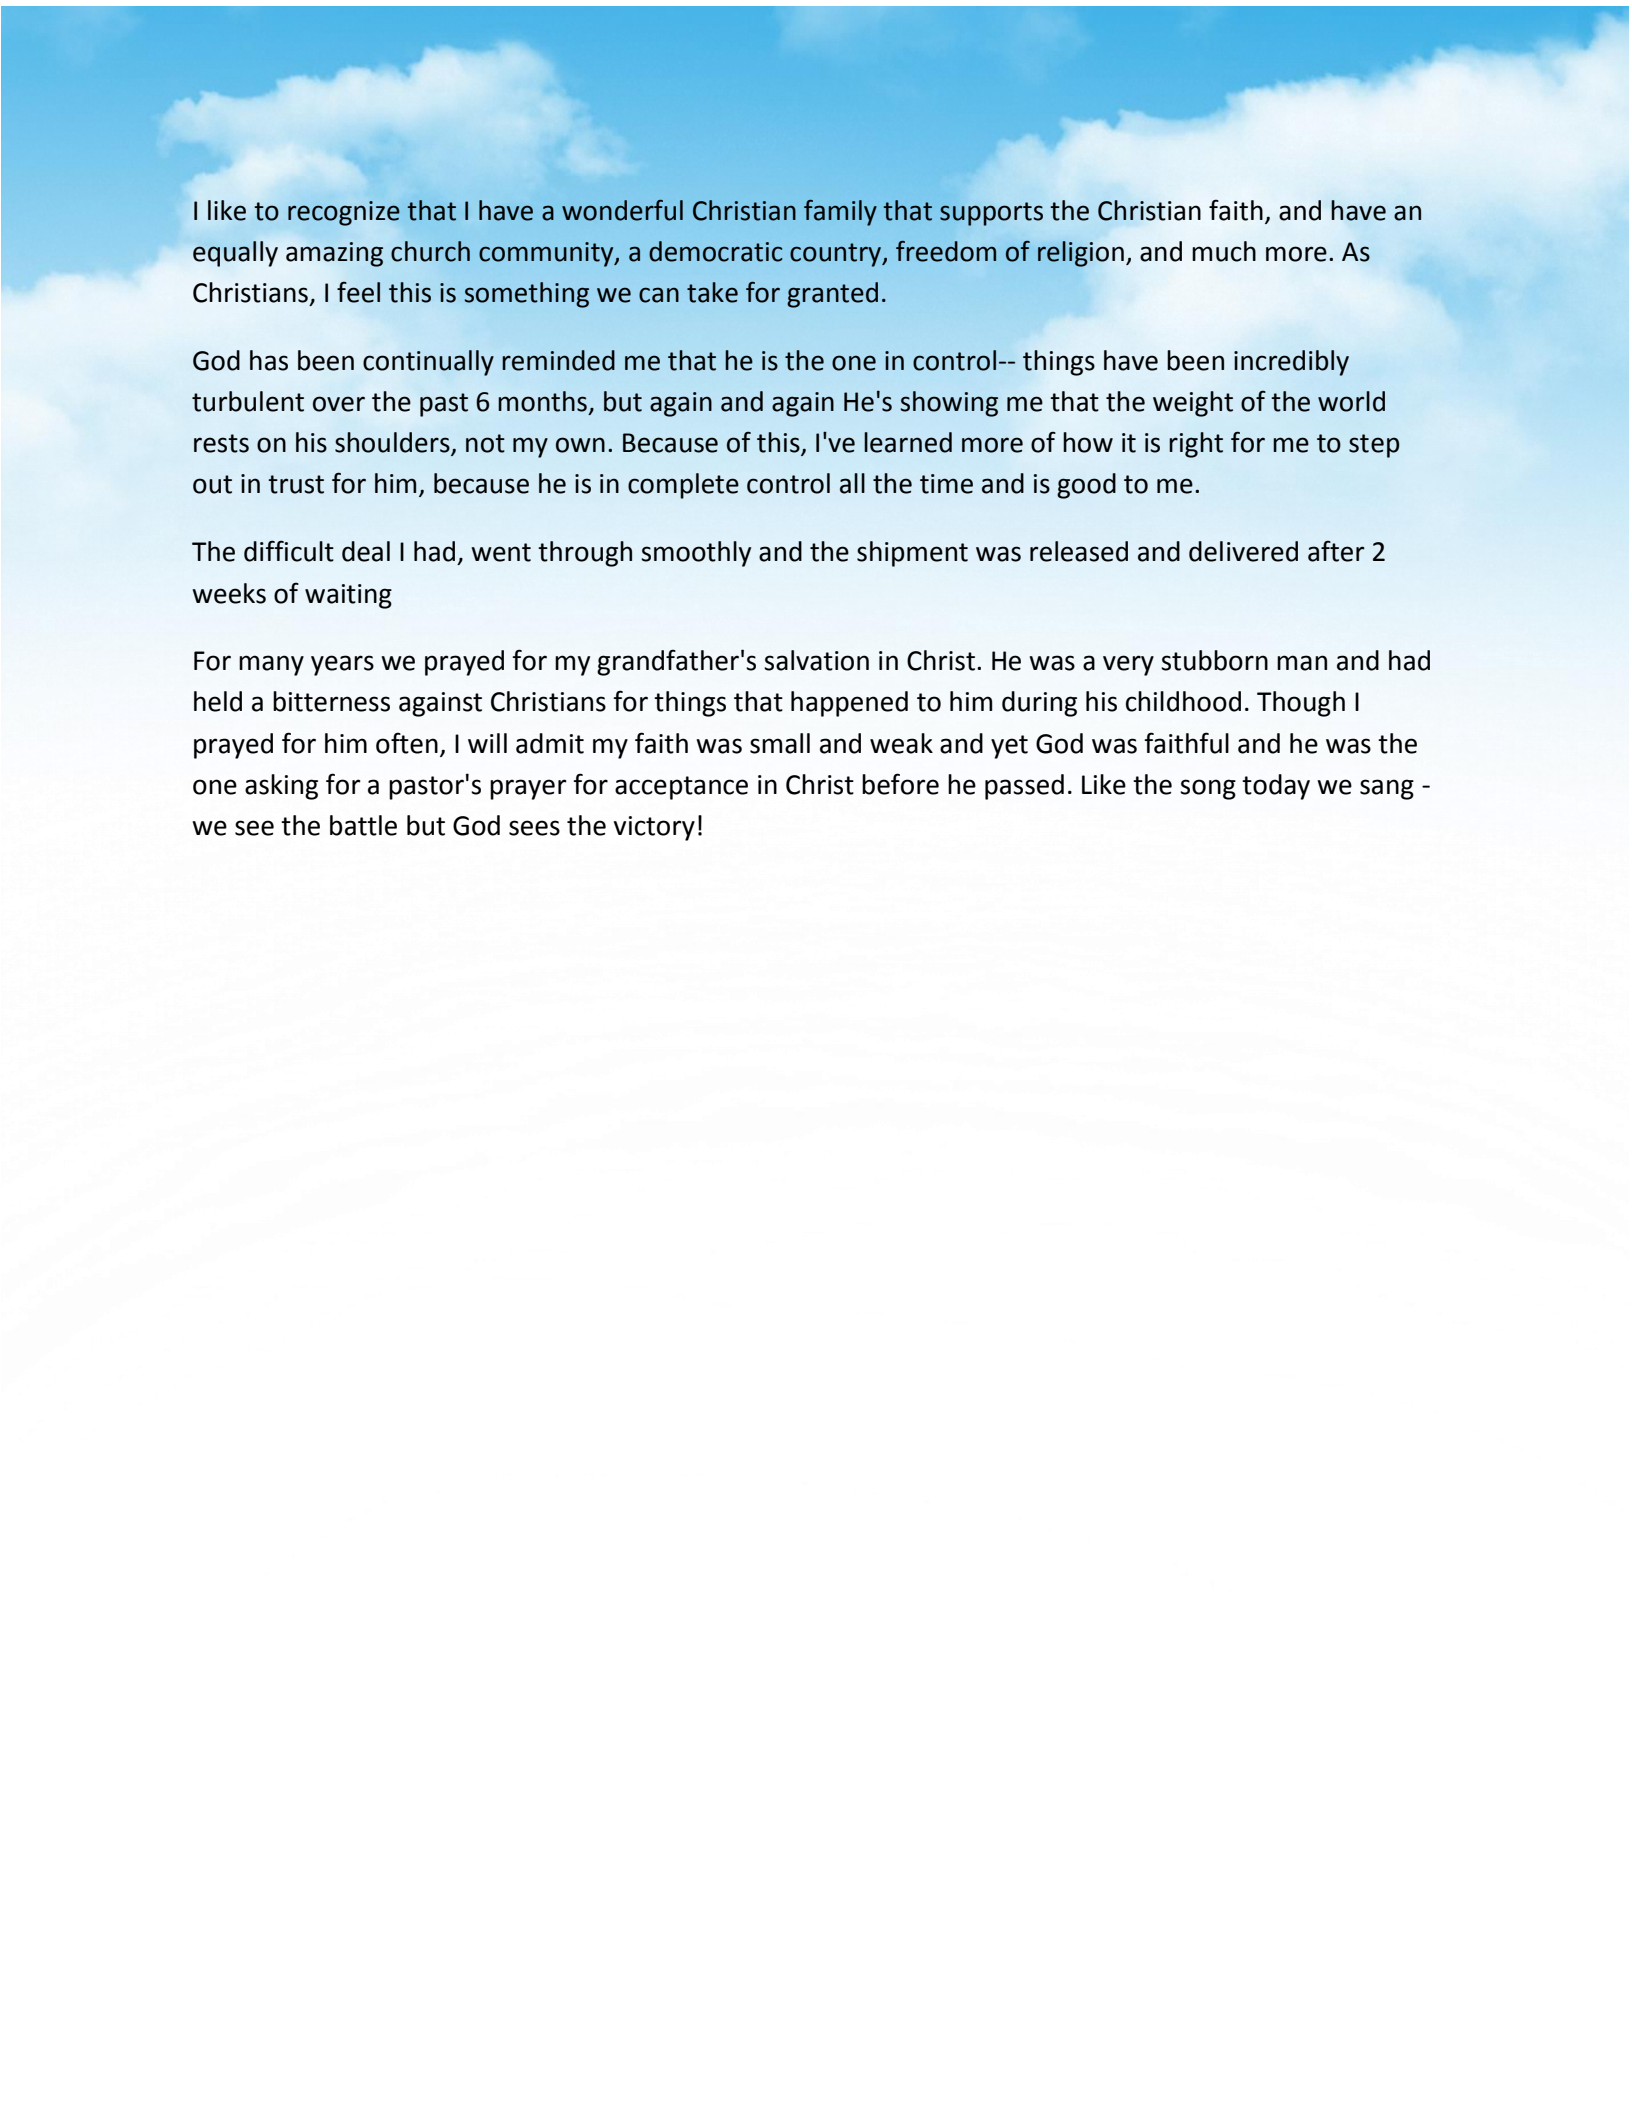

God has been faithful. He keeps everyone in our family health and our mental state in tip top shape. We have never felt losing hope and despair during this period of pandemic. To God be the Glory!

When I had a big question about the origin of the universe I prayed to God to show me the truth. He showed me that true history and science supports creation and not evolution. Now I can trust the bible 100%.

A few months before chaperoning a High School Missions trip to China, the elevator in my office building from the underground parking stopped working and I had to walked up and down the stairs everyday with my laptop from/to Parking Level 3 and 5th Floor. I didn't understand why it was taking so long for the elevator to be fixed until we got to a High School in China where we had to go up and down the auditorium which was on the 4th floor. God has been training me physically to have the endurance to be able to go up and down those stairs!

Yes. Thank God for gift of technology during pandemic to connect with family and friends; for caring church family reaching out to one another.

Praise God 🙏. I am forever grateful and thankful to God for seeing that I had an expedited and successful surgery, and that it occurred just before the pandemic lockdown. Thank you God

I like to recognize that I have a wonderful Christian family that supports the Christian faith, and have an equally amazing church community, a democratic country, freedom of religion, and much more. As Christians, I feel this is something we can take for granted.

God has been continually reminding me that he is the one in control-- things have been incredibly turbulent over the past 6 months, but again and again He's showing me that the weight of the world rests on his shoulders, not my own. Because of this, I've learned more of how it is right for me to step out in trust for him, because he is in complete control all the time and is good to me.

The difficult deal I had, went through smoothly and the shipment was released and delivered after 2 weeks of waiting

For many years we prayed for my grandfather's salvation in Christ. He was a very stubborn man and had held a bitterness against Christians for things that happened to him during his childhood. Though I prayed for him often, I will admit my faith was small and weak and yet God was faithful and he was the one asking for a pastor's prayer for acceptance in Christ before he passed. Like the song today we sang - we see the battle but God sees the victory!
